PAPER SOFT

	Awerment - 6
1>	What is props drilling?
	perops deilling is nothing but when we
	need to send props from one level to other like from parent to nth child in the
	component, the intermediary components
	leut are outing as a pathway to pass
	those props to the child which outually needs them.
2>	What is fornik & yet? Fornik is a small group of React
	Gornik is a small group of React
	Components & hooks for levilding forms
	Yup is a JS schena builder for value
	possing & valedation. Yels when a are rusedibly powerful & supposed modeling
	complex, interdependent validations, os
	value teransporation.
